## LCD-Array Kits & Instrumentation

**DENGUE 1.4** LCD-Array Kit  
DNA based identification of all Dengue Virus serotypes

- Sensitivity** - 10 copies per µl
- Specificity** - 100% sensitivity
- Fast Protocol** - 15 minutes
- Simple & Robust** - easy to use

**HPV Type 3.5** LCD-Array Kit  
DNA based identification of 12 human papilloma viruses

- Sensitivity** - 10 copies per µl
- Specificity** - 100% sensitivity
- Fast Protocol** - 15 minutes
- Simple & Robust** - easy to use

**MYCO Direct 1.7** LCD-Array Kit  
DNA based identification of 171 fungal species

- Sensitivity** - 10 copies per µl
- Specificity** - 100% sensitivity
- Fast Protocol** - 15 minutes
- Simple & Robust** - easy to use

**MYCO Resist 3.0** LCD-Array Kit  
Detection of single nucleotide polymorphisms (SNPs) associated with drug resistance in 48 antimicrobials

- Specificity** - 100% sensitivity
- Fast Protocol** - 15 minutes
- Simple & Robust** - easy to use

**FUNGI 2.1** LCD-Array Kit  
DNA based species identification of 17 fungal pathogens

- Sensitivity** - 10 copies per µl
- Specificity** - 100% sensitivity
- Fast Protocol** - 15 minutes
- Simple & Robust** - easy to use

**MEAT Species 1.6** LCD-Array Kit  
DNA based identification of 16 meat & poultry species

- Sensitivity** - 10 copies per µl
- Specificity** - 100% sensitivity
- Fast Protocol** - 15 minutes
- Simple & Robust** - easy to use

**MEAT Wild 2.5** LCD-Array Kit  
DNA based identification of 25 wild animal species

- Sensitivity** - 10 copies per µl
- Specificity** - 100% sensitivity
- Fast Protocol** - 15 minutes
- Simple & Robust** - easy to use

**FISH BACT 1.5** LCD-Array Kit  
DNA based identification of 15 bacterial pathogens in fish & shellfish

- Sensitivity** - 10 copies per µl
- Specificity** - 100% sensitivity
- Fast Protocol** - 15 minutes
- Simple & Robust** - easy to use
